A compact red dot with high mounting plate

Compact and lightweight, designed for rapid aiming on firing points.

- **type:** reflex sight / red dot
- **brand:** FALKE
- **model:** S Police
- **point size:** 2 MB
- **Material:** CNC machined 6061 aluminum
- **sealing:** nitrogen purged - 10 m / 1 h
- **battery:** CR2032 (life up to 2000 h)
- **mounting:** high mounting plate
- **accessories:** flip-up protective cover provided

The **FALKE S Police reflex sight** offers a small optical footprint without compromising on aiming quality: the objective is to offer ultra-fast acquisition and simple installation on a high plate to maintain a natural aiming posture.

Ergonomics and use

The compact size and high platform promote a consistent head position and natural target acquisition. The low weight and careful finish make the whole thing discreet and pleasant during long training sessions at the range.

Aiming performance

Thanks to a small reticle and the practical absence of parallax at usual range distances, the sight facilitates rapid alignment and precise impact, ideal for shooting at gong or silhouettes.

Compatibility and modularity

The S model is easily paired with a **magnifier** to extend the visual range; mounted in this way, it allows you to engage targets at greater distances while maintaining the acquisition speed of a red dot.

Maintenance and robustness

Machined 6061 aluminum construction ensures rigidity and impact resistance. The finish and sealing allow for reduced maintenance: a quick dusting and periodic inspection are all that's needed to maintain high-performance optics.

Nitrogen purged

Nitrogen purging involves replacing the internal air in the optics with dry nitrogen: this prevents internal fogging and improves sealing in wet conditions, ensuring clear vision even after brief immersion.

Absence of parallax

The practical absence of **parallax** means that the dot remains aligned with the target even if the eye moves slightly relative to the optical axis. In practical terms, this simplifies instinctive aiming and increases the consistency of impacts.

Unlimited eye relief

Unlimited eye relief means the eye can be positioned freely behind the optic without loss of useful field; advantage: speed of acquisition and comfort for different shooters and positions.

- **Recommended use:** sport shooting, training, professional use
- **weight:** compact format, reduced footprint
- **mounting:** high plate supplied, compatible with standard plates
- **accessories included:** flip-up windscreen
- **warranty:** complies with FALKE standards (manufacturer information)
