Semi-automatic pistol on the AK mechanical base!

PAK-9 semi-auto pistol in 9 mm Parabellum caliber with 2 10-shot magazines. Same operation as the legendary AK47 rifle.
Weapon sold with a 1-point strap and a code jumper lock. No scratch: 1/16 "

Caliber: 9mm Parabellum

Barrel: Rifled in steps of 16 CMS

Magazine Capacity: 10

Platinum: Single action

Principle of operation: Cylinder head not wedged

Total Length: 36.2cm

Weight: 2.76kg

Sight: Fixed rise & adjustable front sight

Materials: Steel & Polymer

Finish: Black

Barrel thread: 1/2" x 28

The PAK-9 is made from high quality steel with exceptional fit and finish and also features an interchangeable Glock magazine adapter (sold separately) that allows the use of Glock magazines.

The PAK-9 is equipped with 4 Picatinny rails: a rail on the top for optical attachment, 2 side picatinny rails on the front of the weapon for lamps or lasers and a rail in front of the trigger guard arch for front handle attachment.

The PAK-9 with its machine gun look benefits from the incredibly resistant mechanics imagined by Michail Kalashnikov for his famous AK47 assault rifle and then for the AK74. Chiappa's PAK-9 uses the 9x19 mm semi-automatic pistol ammunition and not the 7.62x39 of the original AK47s, resulting in a particularly compact and easy to control pistol.
