Incredible stability and controlled recoil thanks to its barrel in a low position.

The **Chiappa Rhino 60 D Gen II 9x19mm** revolver stands out for its innovative design, placing the barrel in a low position for unparalleled recoil control. Its precision mechanics and fine adjustments appeal to demanding shooters looking for consistency and performance.

- **caliber:** 9x19 mm
- **barrel length:** 6 inches
- **trigger type:** double action only
- **frame:** aeronautical aluminum alloy
- **finishes:** Cerakote Kobalt Kinetics Slate
- **sights:** adjustable optical fiber
- **handle:** ergonomic with fingerprint
- **Accessories included:** 3 Moon Clips, tools, swab, carrying case

Ergonomics and handling

Thanks to its **low-positioned barrel** , the **Rhino 60 D Gen II Revolver** drastically reduces barrel lift at the start of the shot. This configuration places the barrel axis as close as possible to the hand, which limits rotational torque and ensures unmatched stability. Every shot remains fluid, fast and naturally controlled.

Customizable settings

The **internal mechanism** has been redesigned to offer fine adjustments: the **hammer spring** and the **trigger return spring** are now separate, allowing for independent adjustment. An **adjustable trigger travel stop** completes this assembly, allowing precise adaptation to each individual

shooting style.

Cerakote Kobalt Kinetics Slate finish

The **Cerakote coating** provides superior resistance to corrosion, abrasion, and extreme conditions. This premium ceramic coating, applied to the aluminum frame, gives the revolver increased durability and a modern, understated, and professional appearance.

Aircraft aluminum alloy

Used for the **frame** , this alloy combines lightness and rigidity. It allows for a reduction in mass without compromising mechanical strength. The result: a well-balanced weapon that is pleasant to handle during long sport shooting sessions.

Fiber optic sights

Fiber optic inserts promote rapid target acquisition, even in variable light conditions. Their precise adjustment ensures natural aiming, perfect for precision shooting at distance.

- **total length:** 270 mm
- **weight:** 1200 g
- **capacity:** 6 shots
