9 mm parabellum cartridges for automatic pistols.

9x19mm

- Caliber: 9mm PARA (9mm Luger)
- Type: FMJ (Full Metal Jacket)
- Ball weight: 124 grs (8.0 g)
- Ballistic coefficient: 0.128
- Test barrel length: 125 mm
- Box: 50 cartridges
- Category B – sport shooting use only

Designed for demanding shooters, **GECO 9x19mm FMJ 124g ammunition** delivers consistent performance for training sessions and precision shooting. Through rigorous manufacturing and ongoing quality control, each cartridge guarantees reliable and smooth operation.

A standard for regular shooting

The 124g FMJ bullet, with a lead core and metal jacket, ensures good penetration, moderate recoil and excellent grouping. Its initial velocity of 360 m/s and its energy of 518 J allow for consistent accuracy on target.

Reliability Choice

Whether for intensive training sessions or regular recreational shooting, the GECO FMJ ensures consistent performance, without excessive fouling, in any 9mm chambered pistol.

- Standard lead
- Reference barrel length: 150 mm
- Speed at 10 m: 350 m/s / 25 m: 337 m/s / 50 m: 319 m/s
- Energy at 10 m: 490 J / 25 m: 454 J / 50 m: 407 J

What is an FMJ bullet?

A **FMJ (Full Metal Jacket)** bullet is a projectile whose lead core is covered with a **metal jacket** – often brass – over its entire surface, except at the base. This design protects the bullet during feeding, improves penetration and **limits barrel fouling** . It is ideal for **sport shooting** and training thanks to its ballistic stability and low cost.

Unlike a **TMJ (Total Metal Jacket)** bullet, the FMJ leaves the bottom of the lead core exposed. This can result in a slight emission of **lead dust** when fired, especially in indoor ranges. In contrast, the TMJ completely covers the lead, even at the base, reducing lead exposure and making the gun easier to maintain.
