The optimized cleaning system for a clean barrel in fewer passes.

The **Real Avid Bore-Max® Speed Jag™ & Patches** combines a **high-performance jag** with **pre-formed patches** that provide maximum contact with the barrel rifling. This exclusive design improves cleaning efficiency, reduces the number of passes required, and simplifies the maintenance of **rifled firearms** .

- **Type:** Cleaning jag with dedicated patches
- **Compatibility:** Depending on the caliber chosen
- **Calibers available:** .22, .22/.223/5.56, .243/6 mm, .260/6.5 mm, .270, .284/7 mm, .30/7.62 mm, .380/9 mm, .40, .45
- **Technology: Speed Jag™**
- **Patches supplied:** 25 **Speed Patches**
- **Use:** Cleaning rifled barrels

A completely redesigned cleaning system

The **Real Avid Bore-Max® Speed Jag™** uses specially developed **Speed Patches** to provide more effective cleaning than traditional square patches. Once centered on the jag, the patch conforms perfectly to the rifling of the barrel without creasing or accumulating inside.

Maximum contact with the scratches

Unlike traditional systems using a patch holder or standard jag, the **Speed Jag™** design maximizes the contact area between the patch and the inside of the barrel. The result is a more consistent cleaning that generally requires fewer passes.

Less effort, more efficiency

Thanks to their optimized shape, **Speed Patches** slide smoothly into the barrel while maintaining even pressure on the rifling. This design reduces the effort required for cleaning and improves the removal of powder residue, copper, or lead, depending on the product used.

Available for most major calibers

The system is offered in numerous calibers to ensure an optimal fit: **.22** , **.223/5.56 mm** , **.243/6 mm** , **.260/6.5 mm** , **.270** , **7 mm** , **.30/7.62 mm** , **9 mm** , **.40** and **.45** . Each version is designed to provide the best possible contact with the corresponding barrel.

An ideal solution for regular maintenance

Whether after a sport shooting session or before storing the weapon, the **Bore-Max® Speed Jag™** system allows you to quickly obtain a clean barrel with less handling and consistent efficiency.

FAQ

What is the difference between a Speed Jag™ and a classic jag?

The Speed Jag™ uses specially cut patches that ensure uniform contact with the rifling of the barrel without forming creases, thus improving cleaning efficiency.

How many patches are provided?

Each kit includes a Speed Jag™ and 25 Speed Patches tailored to the corresponding caliber.

For which calibers is this system available?

The Bore-Max® Speed Jag™ is offered for major rifle calibers, including .22, .223/5.56, .243, .260/6.5, .270, 7mm, .30/7.62, 9mm, .40 and .45.
