The professional tool for replacing or adjusting Glock sights with precision.

The **Real Avid Sight Pusher for Glock** allows for the precise removal and installation of **Glock** pistol **sights** without damaging the slide. Its **Easy Torque Handle™** , secure slide support, and integrated **2-in-1 gunsmithing tool** make it a complete solution for maintenance and customization.

- **Type:** Tool for mounting and dismounting sighting devices
- **Compatibility:** All **Glock** pistols
- **Sights:** Original and aftermarket dovetail models
- **Handle:** Oversized **Easy Torque Handle™**
- **Pushing system:** High-precision multi-surface press block
- **Retention:** Universal locking base for Glock slide
- **Integrated tool:** 3/16" hex key + 3 mm gunsmith's pin punch
- **Use:** Installation, replacement and adjustment of sights

Safe replacement of sights

The **Real Avid Sight Pusher for Glock** was specifically developed to facilitate the replacement of dovetail-mounted **sights** on **Glock** pistols. Its design allows for perfectly controlled pressure to be applied when removing or installing sights without marking the slide or damaging any parts.

Compatible with all Glock models

Thanks to its universal locking base, the tool accepts slides from subcompact, compact, standard, and competition models. It is compatible with both original sights and most aftermarket models using a Glock dovetail.

Optimal precision thanks to the Easy Torque Handle™

The large **Easy Torque Handle™** provides ample leverage while minimizing the effort required. Precision threads ensure smooth movement of the thrust block, allowing for fine adjustment and perfect control when mounting or centering a sight.

Multi-surface press block

The pushrod was designed with multiple contact surfaces to accommodate different Glock rear sight profiles. Pressure is applied directly to the dovetail, ensuring smooth movement and minimizing stress on the components.

A true gunsmith's tool

The integrated **2-in-1 Tool™** in the grip includes a **3/16" wrench** for removing the front sight and a **3mm punch** for common disassembly and maintenance tasks on Glock pistols. The entire assembly remains compact and always readily accessible within the tool.

Designed for heavy-duty use

Its robust construction allows for regular use in the workshop or at home. Whether installing an adjustable rear sight, replacing a front sight, or recentering a sight, this tool offers precision worthy of professional gunsmithing equipment.

FAQ

Which Glock models is this tool compatible with?

The Sight Pusher is compatible with all Glock pistols, whether subcompact, compact, standard or competition models.

Can it be used with aftermarket sights?

Yes. It is designed to work with original Glock sights as well as with the majority of aftermarket dovetail-mounted models.

Does the tool also allow for gun maintenance?

Yes. It incorporates a 2-in-1 tool including a 3/16" wrench for the front handlebar and a 3mm pin punch for routine disassembly and maintenance operations.
