SKU	Designation	French Law	Height (cm)	Weight (g)	MSRP
KIJ300	REAPER GRIP COMPLETE HEAD	Vente libre	163	1134	520.00 € incl. tax

A universal rifle rest that adapts to each shape of stock and frame

- Robust aluminum construction
- Adjustable non-slip jaws to fit straight and tapered stocks
- For barrel with a thickness of 25.4 mm to 76.2 mm
- 360° rotation with lock
- 109° elevation range (21° up and 87° down)
- Offset head to facilitate weapon handling
- Design preventing any tearing of the weapon at the time of the shot.
- 3/8"-16 thread and adapter for 1/4"-20 thread
- Weight: 1134g

The REAPER GRIP tripod mounting head has been designed for intensive use, particularly in the field of intervention forces.

It provides the rifle with a safe, stable and effective support, preventing the weapon from slipping out of the mount when firing.

Its innovative design allows it both to obtain a significant retention on the weapon while offering a certain freedom of movement of the weapon, in order to facilitate the taking of sight.

Its adjustable jaws adapt to all shapes of sticks, barrels and frames, whether straight, conical or oval.

With its offset design, it facilitates handling of the weapon, in particular for the introduction or removal of a magazine.

Its fluid head allows 360° rotations and 109° elevation.

It attaches to any tripod or mounting system with a 3/8"-16 or 1/4"-20 mounting screw thanks to its adapter. Initially dedicated to professional use, the KJI shooting supports allowed unparalleled shooting comfort and reduced fatigue for a shooter who had to keep his position for hours.

Offered to hunters and sport shooters, KJi products allow shooting with incredible precision at ever greater distances.
