- For barrel with a thickness of 25.4 mm to 76.2 mm
- Design preventing any tearing of the weapon at the time of the shot.
- 3/8''-16 thread and adapter for 1/4''-20 thread
- Weight: 535g

The REAPER GRIP tripod mounting head has been designed for intensive use, particularly in the field of intervention forces.

It provides the rifle with a safe, stable and effective support, preventing the weapon from slipping out of the mount when firing.

Its innovative design allows it both to obtain a significant retention on the weapon while offering a certain freedom of movement of the weapon, in order to facilitate the taking of sight.

Its adjustable jaws adapt to all shapes of sticks, barrels and frames, whether straight, conical or oval.

With its offset design, it facilitates handling of the weapon, in particular for the introduction or removal of a magazine.

This REAPER GRIP upper plate allows holders of a Picatinny or ARCA SWISS fluid head to be able to invert the supports according to the rifle used for shooting.

Initially dedicated to professional use, the KJI shooting supports allowed unparalleled shooting comfort and reduced fatigue for a shooter who had to keep his position for hours.

Offered to hunters and sport shooters, KJi products allow shooting with incredible precision at ever greater distances.
