A premium one-piece mount with a 20 MOA slope for long range shooting

- A robust and light cantilever
- 20 MOA tilt for TLD
- Machined from 7075-T651 aircraft aluminum
- ScopeLink™ attachment system for mounting accessories
- Compatible with MILSTD 1913 21mm picatinny rails
- Bubble level integrated in the assembly
- Matt black anodizing coating
- Distance between collars: 60 mm

The AUDERE LEVITAS is a one-piece cantilever-type mount that allows a scope to be attached remotely to your weapon.

Its 20 MOA tilt makes it perfectly suited for AR10s and TLD or PRS rifles that do not have a base or upper with a sloped picatinny rail.

In addition to its elegant and advanced design, it was developed for intensive use by law enforcement and the military.

Its one-piece design provides significant rigidity to the bezel, without suffering from significant weight.

The machining and finishing precision provided by AUDERE to its products make them top-of-the-range optical mounts dedicated to shooting accuracy and durability.
