A special CQB sound moderator, directly attached to the AR15 thread

- For caliber 5.56 / 223 Rem
- Thread 1/2x28 UNEF
- Machined from steel with black coating and steel baffles
- Full-auto certified

- Diameter: 50mm
- Requires no maintenance before 10,000 strokes

A robust and efficient silencer specially developed for AR15 platforms.

Its innovative design completely eliminates gas returns that can disturb the shooter.

In addition to the noise reduction it provides, the M80 significantly reduces the weapon's recoil and heat signature, while maintaining the accuracy of the weapon.

Tried and tested, this silencer is capable of withstanding everything even in the most difficult conditions.

SAI has conducted studies regarding the strength and durability of their muffler. The adoption of steel for the design of its moderators makes it possible to withstand significant temperature rises of up to 610°C for firing in full auto, without causing any deformation of the material.

Its internal design reduces heat transmission through the steel. For an internal temperature of 610°C the external heat will only be 370°C.

Small arms industries is a company based in Denmark, with a long and strong experience in silencers for military purposes.

Their products equip many police units and armed forces around the world.
