The TWS range makes it possible to adapt to everyone's needs with 3 models available.

With its most advanced technology, the TWS works silently, with a smooth and clear image.

With its 8 parameter memorizations, the zeroing is carried out during the first shots only with several different weapons whose settings can be kept and reused later.

You will find in the attached PDF document the table of detection, recognition and target identification distances according to the characteristics of each model.

With its external mounting plates, you can add accessories such as external batteries, or laser rangefinder.

Consult us for the choice of your model.
