XGSCI200	VISION NOCTURNE QUAD TUBES GSCI SWAT G PANORAMIC		Contact us

With its 4 tubes the SWAT G offers a field of vision of 120° horizontally and 50° vertically.

Its contained weight makes it possible to be counterbalanced by most counterweights, including in particular the external battery offered as an option by GSCI.

Its four-tube design facilitates operator progression as well as night observation.

Using PHOTONIS technology, you are guaranteed product quality, precision and reliability.

Available in the following intensifier generations:

- Gen3
- ECHO
- 4G
- ECHO-ELITE
- 4G ELITE
- 4G ELITE PLUS

GSCI also offers the SWAT-G in White or Green phosphor as well as with manual intensity adjustment.

The most advanced GSCI technology for intensive field use.

With its robust aluminum construction, GSCI products will be able to withstand the worst treatment conditions, while offering a contained weight for the user.

Offered with several generations of intensification, the SWAT-G can also have several options such as manual adjustment of the intensification or a white or glass phosphor.
