Equipped with PHOTONIS technology and offered in multiple generations of intensification

The GSCI PVS-31C MOD night vision system was developed for the fighter.

With its very high manufacturing quality and selected components, these binoculars facilitate progress in the field or in an enclosed environment as well as observation, even in very low light.

The PVS-31C MOD has been designed to simplify and make its use instinctive. Once mounted on the helmet, it automatically switches on and off whether it is lowered in front of the eyes or raised. Each tube switches off automatically independently of the other, when one of them is raised.

These JVNs feature an IR illuminator with a quick and momentary activation button allowing operator-to-operator communication other than by radio.

The system can be fitted with a bayonet or slide-on type helmet mount.

Available in the following intensifier generations:

- Gen3
- ECHO
- 4G
- ECHO-ELITE
- 4G ELITE
- 4G ELITE PLUS

GSCI also offers the PVS-31C MOD in White or Green phosphor as well as with manual intensity adjustment.

Features :

- Optical magnification x1
- 27mm lens
- Focus; from 0.25m to infinity

- IR Illumination: 950nm
- Low battery indicator
- 1x AA or 1x CR123 battery
- Autonomy up to 40 hours
- External battery compatible
- Size 108x108x70mm
- Weight 595g
- Operating temperature: -40°C to +50°C
- 7 year warranty

With its robust aluminum construction, GSCI products will be able to withstand the worst treatment conditions, while offering a contained weight for the user.

Proposed with in several generations of intensification, the PVS-31C MOD can also have several options such as the manual adjustment of the intensification or a white phosphor or glass.

It is also possible to add optical magnification modules
