CG5004	CLAWGEAR Picatinny Mount for AK Rise	Vente libre	11	2	2.12	55	21mm rail	114.00 € incl. tax

To improve shooting performance.

Red dot mounting system for AK platform replacing the original sight of the weapon.

- Machined from quality aluminum alloy
- 21mm Picatinny rail with 9 slots
- Rise included adjustable in elevation
- Design to fit the curve of the AKM cover which can be removed without dismantling the system
- Perforated rail allowing the use of original sights
- Compatible with AK47, AKM, AK74 and variants originally fitted with a Mauser type rear sight
- Not compatible with SKS

This mounting base allows you to upgrade your AK with the addition of an aiming or optical aid, in order to improve your shooting accuracy and quick aiming.

Its perforated channel, and the presence of an integrated rise allows in case of failure of the red dot on the ground, to use the metal sights.

The design of this base allows a complete disassembly of the weapon without it being necessary to remove this CLAWGEAR system. This preserves the zeroing of the optics in each maintenance.

Assembly advice:

The CLAWGEAR plate is fixed in place of the original sight of the weapon by reusing the original pin for the assembly. Install the central screw and tighten it until the alignment of the rise and the front sight. Insert the two screws at the front end of the rail and tighten them firmly (Maximum tightening torque 3 Nm)
