CG5007	CLAWGEAR anti-blast compensator for AR15 cal. 223 thread 1/2X28 UNEF	Vente libre	144.00 € incl. tax

The ideal accessory for shooting in confined spaces

- Machined from hardened steel
- 3 expansion chambers reducing recoil and barrel lift
- Sealed body to reflect gas and noise forward
- Compatible with AR15s chambered in cal. 223/5.56 with 1/2x28 TPI thread
- Spikes for break-ins made of hardened steel
- Not compatible with OBERLAND ARMS OA-15
- "Crush washer" provided for perfect alignment with the barrel

The CLAWGEAR linear type compensator has multiple interests. It reduces the recoil of the weapon as well as the raising of the barrel when firing, which has the effect of facilitating the return to battery, for more precise and rapid firing.

In CQB or in confined environments, such as a vehicle, the compensator redirects the blast of the shot forward, causing no discomfort or destabilization for the shooter(s) nearby.

Its robust design in tempered steel with its sharp points, allows it to practice break-ins without flinching in order to break windows or break down doors.
