CG5007	CLAWGEAR blast compensator cal. 223 thread 1/2X28 UNEF	Vente libre	144.00 € incl. tax

- Machined from hardened steel
- 3 expansion chambers reducing recoil and barrel lift
- Sealed body to deflect gases and noise forward
- Compatible with AR15s chambered in .223/5.56 cal. with a 1/2x28 TPI thread
- Hardened steel burglar tips
- Not compatible with OBERLAND ARMS OA-15
- "Crush washer" provided for perfect alignment with the barrel

The CLAWGEAR linear type compensator has multiple advantages. It reduces the recoil of the weapon as well as the rise of the barrel when firing, which has the effect of facilitating the return to battery, for more precise and rapid rhythmic shots.

In CQB or confined environments, such as a vehicle, the compensator redirects the blast of the shot forward, causing no discomfort or destabilization for the nearby shooter(s).

Its robust design in hardened steel with its sharp points allows it to carry out break-ins without flinching in order to break windows or force down doors.
