- Compatible with AR10s chambered in .30 cal with a 5/8x24 TPI thread
- "Crush washer" provided for perfect alignment with the barrel
- Hardened steel burglar tips
- Not compatible with OBERLAND ARMS OA-10

The CLAWGEAR linear type compensator has multiple advantages. It reduces the recoil of the weapon as well as the rise of the barrel when firing, which has the effect of facilitating the return to battery, for more precise and rapid rhythmic shots.

In CQB or confined environments, such as a vehicle, the compensator redirects the blast of the shot forward, causing no discomfort or destabilization for the nearby shooter(s).

Its robust design in hardened steel with its sharp points allows it to carry out break-ins without flinching in order to break windows or force down doors.
