CG5009	CLAWGEAR anti-blast compensator for AK cal. 30 thread M14x1LH	Vente libre	138.00 € incl. tax

- Machined from hardened steel
- 3 expansion chambers reducing recoil and barrel lift
- Hardened steel burglar tips
- Sealed body to deflect gases and noise forward
- Compatible with AK platforms in 7.62x39 with an M14x1LH thread
- Not compatible with AK100, AKS-74U and Saiga series

The CLAWGEAR linear type compensator has multiple advantages. It reduces the recoil of the weapon as well as the rise of the barrel when firing, which has the effect of facilitating the return to battery, for more precise and rapid rhythmic shots.

In CQB or confined environments, such as a vehicle, the compensator redirects the blast of the shot forward, causing no discomfort or destabilization for the nearby shooter(s).

Its robust design in hardened steel with its sharp points allows it to carry out break-ins without flinching in order to break windows or force down doors.
