CG5009	CLAWGEAR anti-blast compensator for AK cal. 30 thread M14x1LH	Vente libre	138.00 € incl. tax

The ideal accessory for shooting in confined spaces

- Machined from hardened steel
- 3 expansion chambers reducing recoil and barrel lift
- Spikes for break-ins made of hardened steel
- Sealed body to reflect gas and noise forward
- Compatible with AK platforms in 7.62x39 with M14x1LH thread
- Not compatible with AK100, AKS-74U and Saiga series

The CLAWGEAR linear type compensator has multiple interests. It reduces the recoil of the weapon as well as the raising of the barrel when firing, which has the effect of facilitating the return to battery, for more precise and rapid firing.

In CQB or in confined environments, such as a vehicle, the compensator redirects the blast of the shot forward, causing no discomfort or destabilization for the shooter(s) nearby.

Its robust design in tempered steel with its sharp points, allows it to practice break-ins without flinching in order to break windows or break down doors.
