Ballistic protection plate conforms to NIJ 0101.04 and NIJ 0101.06 standards.

Its manufacture in Polyethylene makes it light while providing great ballistic protection and avoiding fragmentation of the warhead on impact.

Fully configurable, it can be combined with NIJ IIIA soft ballistic protection (ICW) or used as sole ballistic protection (SA).

Its design favors the dispersion within the plate of the energy transferred by the projectile at the moment of impact.
