Available in size 25x30 cm or 15x20 cm

- Made of Ceramic, Polyethylene and Aramid
- Class IV protection
- Protects against ammo up to 5.56x45 SS109, 7.62x39 MSC, 7.62x51 M80, 7.62x54 mm and the 30-06 Armor piercing
- Weight ranging from 2.3 kg to 2.5 kg
- Dimensions: 25x30 (Front and back plate) or 15x20 (Side plate)

Options available:

- ICW or Stand Alone (SA)
- Single Curve or Multi Curve
- External coating in Polyurea or Cordura

Ballistic protection plate conforms to NIJ 0101.04 and NIJ 0101.06 standards.

Fully configurable, it can be combined with NIJ IIIA soft ballistic protection (ICW) or used as sole ballistic protection (SA).

The development combining ceramic, polyethylene and aramid provides excellent protection against armour-piercing ammunition while limiting the weight of the plate. In addition, it avoids the fragmentation effect of the warhead when it hits the protection.

Its design favors the dispersion within the plate of the energy transferred by the projectile at the moment of impact.

Sale only reserved for administrations, security companies and members thereof.
