A unique cleaning solution for sound moderators

- A concentrated solution to be diluted in water with a ratio of 33%
- Allows to preserve the performances of the silencer on the acoustic level and the precision in target
- Allows cleaning in 30 min to 2:00 a.m. depending on the degree of clogging of the sound reducer.

Manual :

- In a container, dilute half a bottle of Silencer Care with water to obtain a 500 mL cleaning solution
- If possible, disassemble the muffler and immerse it in the cleaning solution.
- Leave to act for 30 minutes to 2 hours depending on the condition of the muffler, occasionally shaking the solution.
- The solution will take on a more intense black color, a sign of successful cleaning
- Remove the muffler and clean the accessible areas with a microfiber cloth.
- Rinse the muffler thoroughly with water and shake it to extract all loose residue.
- Let the moderator dry in the open air or with compressed air.

Muffler cleaning is recommended every 50 to 200 shots.

It increases the lifespan of the sound moderator, maintains its sound performance and guarantees good target accuracy.
