STORMHUNTER Special Edition: Brushed aluminum styling and recoil control for the stand.

STORMHUNTER special edition in brushed aluminum, designed for sport shooters looking for control and visual identity on the shooting range.

- **caliber:** .357 Magnum
- **shots:** 6
- **total length:** 266 mm
- **barrel length:** 152 mm
- **weight:** 955 g
- **carcass:** Ergal (7075-T6)
- **finish:** brushed aluminum STORMHUNTER
- **sights:** adjustable optical fibers
- **mode:** double and single action

The **STORMHUNTER** edition of the **Rhino 60 DS** combines a striking aesthetic with technical advantages that are useful in competition or training. Its brushed aluminum finish gives it a strong visual presence while maintaining the model's mechanical qualities.

Ergonomics

The anatomical grip and engineered contours provide a consistent, comfortable grip. At the range, the grip makes it easier to manage double and single action shots, improving repeatability and perceived accuracy.

Lower axis

"Low-axis" means the barrel is aligned with the lower chamber of the cylinder rather than the upper chamber. This configuration brings the recoil axis closer to the hand axis, reducing barrel rotation and windup, resulting in better control of rapid rounds.

Ergal (7075-T6)

Ergal is a high-strength aluminum alloy (7075-T6) used for the frame: light, rigid and durable. It reduces the overall weight without compromising strength, promoting less tiring handling during long pit sessions.

Picatinny rail

The integrated Picatinny rail under the barrel allows for the addition of standardized optics or accessories. For a competitor, this guarantees repeatable attachment and the ability to adapt the configuration to the needs of the firing range.

Moon clips

Moon clips hold cartridges together for faster loading/extraction from the barrel. They are particularly useful in timed series or to reduce reload time between changes.

Interview

The brushed aluminum finish is durable and easy to clean. Regular maintenance (greasing the axes, checking the barrel and optical fibers) will prolong the precision and aesthetics of the STORMHUNTER edition.

- **barrel:** 6-shot steel
- **pads:** black anatomical wood
- **rail:** Picatinny under the barrel
- **accessories included:** 3 moon clips, screwdriver, swab, polypropylene case
- **Recommended use:** sport shooting, range training
