Optimize your tactical lighting with the Daniel Defense remote mount, designed for reliable and ergonomic installation on your Picatinny rail.

The Daniel Defense Offset Flashlight Mount offers a practical and robust solution for positioning your tactical flashlight. Compatible with Picatinny rails, it ensures a solid installation and optimal ergonomics for quick and intuitive access to your lighting.

Technical characteristics:

- **Material** : 6061-T6 Aluminum
- **Finish** : Mil-Spec Type III anodizing
- **Compatibility** : Picatinny rails and standard tactical lights
- **Design** : Offset design for improved ergonomics
- **Fixing** : Robust and secure system
- **Weight** : Lightweight to minimize bulk
- Mounting for 1" (25.4 mm) lamp.

The **Daniel Defense Remote Flashlight Mount** is an essential accessory to enhance the functionality of your weapon. Precision-designed, it allows for optimal positioning of your tactical flashlight, ensuring an ergonomic grip and quick use, even in stressful situations.

Intelligent Remote Design

Its offset design allows the lamp to be positioned outside the line of sight, reducing bulk and providing better handling. This system is particularly useful for avoiding interference with other tactical accessories.

Universal Compatibility

The mount is compatible with all Picatinny rails, ensuring quick and easy installation on most modern tactical platforms. It fits a wide range of tactical lights, providing a versatile solution for demanding shooters.

High Quality Materials

Made from aircraft-grade 6061-T6 aluminum, the mount is lightweight yet exceptionally strong. Its Mil-Spec Type III anodized finish provides optimum resistance to corrosion and wear.

Safety and Reliability

The secure mounting system holds the light firmly in place, even during intensive shooting or in demanding environments.
