Take on the most demanding missions with the Kimber Desert Warrior TFS .45 ACP, a tactical 1911 pistol, built for power and precision, ready for suppressor.

The Kimber Desert Warrior TFS .45 ACP pistol is specifically designed for tactical situations where power and accuracy are essential. Designed for law enforcement, security professionals and sport shooters, it combines precision engineering with advanced tactical features.

Tactical Design and Total Resistance

The frame and slide are made of stainless steel with a corrosion- and wear-resistant KimPro II Desert Tan coating. This finish provides both durability and stealth in the field.

Textured G10 buttplates ensure a secure grip, even in the most demanding environments. The integrated Picatinny rail allows for the quick addition of tactical accessories such as lights or lasers.

Suppressor-Ready Threaded Barrel

The 5.5-inch match-grade barrel is threaded, ready to receive a suppressor, thus providing a tactical advantage for covert operations. Its accuracy is exceptional, even at great distances.

Maximum Precision and Power

The adjustable match-grade trigger ensures a clean, consistent release, essential for fast, accurate shots. The sighting system includes tritium dot sights for fast target acquisition day or night.

The ambidextrous safety and wide trigger guard make it easy for both right and left-handed shooters, even with tactical gloves. Each gun is individually tested and tuned for optimum performance right out of the factory.
