- Fixed rear sight and front sight with 3 phosphorescent white dot sights, enhanced for sound reduction
- Trigger tail and perforated hammer in Aluminum
- Grip G10 (fiberglass laminate) textured
- Picatinny rail for accessory mounting
- Capacity: 7+1

Tactical Design and Rugged Construction

The slide and frame are machined from stainless steel, ensuring maximum strength and durability. The KimPro II black finish provides superior resistance to corrosion, abrasion and weathering, while ensuring a professional and discreet appearance.

Textured G10 buttplates provide a firm, secure grip, essential in tactical environments. Integrated Picatinny rail allows for quick installation of tactical accessories such as lights and lasers.

Threaded Barrel for Sound Moderator

The 5.5-inch match-grade barrel is threaded (suppressor-ready), allowing the installation of a suppressor for covert operations or advanced tactical training. This configuration also increases long-range accuracy thanks to the exceptional quality of Kimber machining.

Professional-Level Precision and Performance

Equipped with an adjustable match-grade trigger, the Kimber Custom TLE/RL II TFS delivers a crisp, consistent release, essential for total control. The sighting system features high-visibility tritium dots, ensuring rapid target acquisition, even in total darkness.

The ambidextrous safety and wide trigger guard ensure smooth handling whether you're right or left-handed, even with tactical gloves. Each pistol is individually factory tested to ensure flawless performance right out of the box.
