Its bullpup design ensures a compact length while maintaining an optimal barrel length for increased accuracy.

The Steyr AUG A3 SA M-II is the civilian version of the legendary Austrian assault rifle. Featuring a 41.7 cm cold-hammered barrel and a quick-disassembly system, it offers exceptional accuracy. Its bullpup design reduces the overall length to 71 cm, improving maneuverability without compromising performance. Equipped with an M-LOK rail, it allows for easy addition of accessories to adapt to the needs of professionals.

Bullpup Design and Benefits

The Steyr AUG A3 SA M-II's bullpup configuration places the magazine and firing mechanism behind the grip, reducing the overall length of the weapon while maintaining a standard barrel length. This design improves maneuverability, particularly in tight environments, without sacrificing accuracy.

Materials and Sustainability

The barrel is forged and cold hammered, ensuring optimum durability and accuracy. The high-quality polymer construction ensures increased strength while maintaining a reduced weight, thus facilitating

transport and handling.

Versatility and Customization

Thanks to its M-LOK rail, the Steyr AUG A3 SA M-II offers great modularity, allowing users to customize their weapon with a variety of accessories such as optics, foregrips or lighting systems, thus meeting the specific requirements of each mission or shooting discipline.

Care and Maintenance

The quick-release barrel system makes cleaning and maintenance of the weapon easy, ensuring increased longevity and reliable operation. It is recommended to follow the manufacturer's guidelines for regular maintenance and to use only high-quality ammunition to maintain the performance of the weapon.

Comparison with other models

Compared to other semi-automatic rifles, the Steyr AUG A3 SA M-II stands out for its compact bullpup design, modularity and Steyr's reputation for reliability. Its quick-release barrel system and M-LOK rail provide additional customization and maintenance advantages over competing models.

Technical Glossary

- **Bullpup** : A firearm configuration where the action and magazine are located behind the trigger, reducing the overall length of the weapon without decreasing the barrel length.
- **M-LOK** : Modular mounting system allowing the attachment of accessories to firearms via specific locations.
- **1:9 Rifling Pitch** : Indicates that the projectile makes a full 9-inch revolution inside the barrel, influencing the stabilization of bullets of different weights.

In summary, the Steyr AUG A3 SA M-II is a semi-automatic rifle combining compactness, precision and modularity, perfectly adapted to the needs of sports and tactical shooting professionals.
