Civilian version with long barrel and 1.5x scope integrated into the grip.

The Steyr AUG A3 SA SE is the civilian version of the legendary Austrian assault rifle, equipped with an integrated 1.5x scope for rapid target acquisition. Equipped with a 50.8 cm cold-hammered and chrome-plated barrel, it guarantees exceptional accuracy. Its bullpup design reduces the overall length to 79.5 cm, offering optimal handling without compromising performance. The transparent polymer magazine facilitates visual control of remaining ammunition. Ideal for sport shooting, precision competitions and tactical interventions requiring a compact and reliable weapon.

Integrated 1.5x Scope

The integrated scope offers 1.5x magnification, facilitating fast and accurate target acquisition. The ring reticle allows for intuitive aiming, even in low light conditions. This optic is designed to be rugged, waterproof up to 1 bar and shock resistant, ensuring optimum durability in the field.

Care and Maintenance

To ensure optimum performance, it is recommended that the barrel be cleaned regularly using a suitable cleaning rope, working from the chamber towards the muzzle. The external parts should be wiped with a lightly oiled cloth to prevent corrosion. The integrated scope requires gentle cleaning of the lenses with a

soft, dry cloth to avoid scratches. It is essential to periodically check the safety mechanisms for proper operation and have them serviced by a qualified gunsmith if necessary.

Comparison with other models

Compared to the Steyr AUG A3 SA Flat Top, the SE version with integrated scope offers an all-in-one solution for shooters who prefer a fixed optic, eliminating the need to install additional accessories. This integration ensures consistency between the weapon and the sighting system, reducing overall weight and simplifying handling. Additionally, the 1.5x scope is specifically calibrated for the .223 Remington caliber, providing increased accuracy compared to third-party optics.

Technical Glossary

- **Bullpup** : A firearm configuration where the action and magazine are located behind the trigger, allowing for a shorter overall length without reducing barrel length.
- **Rifling Pitch** : The distance over which the grooves inside the barrel make a complete revolution, influencing the stability and accuracy of the projectile.
- **Ring reticle** : A type of circular reticle used in optical sighting systems, facilitating rapid target acquisition.

In summary, the Steyr AUG A3 SA SE with 1.5x integrated scope is a high-precision semi-automatic rifle, designed for professionals who demand reliable performance in a compact format. Its innovative design and technical features make it a preferred choice for various tactical and sporting applications.
