T0560-0102	ERATAC trigger AR10/15 right	Vente libre	490.00 € incl. tax

Improve the accuracy of your shots with the ERATAC AR10/15 trigger, combining robustness, reliability and optimal adjustment for unparalleled control.

The ERATAC Trigger is a major innovation for AR-15/10 systems, allowing installation without complete disassembly of the weapon. Made of lightweight aircraft aluminum and hardened steel, this single-stage trigger mechanism offers a clean, smooth travel with an ultra-short reset for fast, accurate shots. The user can easily switch between two preset trigger pulls (>1000g and >1500g) with a simple supplied tool. Available with a curved trigger (part number T0560-0101) or straight trigger (part number T0560-0102), this device adapts to all shooter configurations and preferences.

Design and materials

The ERATAC Trigger is designed to deliver superior performance while making it easy to install. Its aircraft-grade aluminum construction ensures optimum lightness, while the hardened steel components ensure increased durability and strength, even under heavy-duty conditions.

Ergonomics and performance

This Single Stage Trigger features a clean, smooth travel, eliminating any perceptible play. The extremely short reset allows for continuous fire with consistent accuracy. The ability to choose between a curved or straight trigger provides customization to suit each shooter's individual preferences.

Compatibility and installation

The real strength of the ERATAC Trigger is its "Drop-In" installation, requiring no complete disassembly of the weapon. Compatible with a wide range of AR systems, including calibers .22lfb, 9mm, 7.62mm, 5.56mm, and brands such as H&K, Haenel, OA, Hera, Tippman, Stag, this device integrates perfectly without additional modifications. For AR10/15 models from manufacturers Haenel and Heckler & Koch, the use of the ERATAC safety (part number T0561-0000) is recommended for optimal compatibility.

Technical advantages

- **Quick installation:** True “Drop-In” system without the need for complete disassembly.
- **Trigger weight adjustment:** Two predefined positions (>1000g and >1500g) adjustable with the tool provided.
- **High Quality Materials:** Combination of aircraft aluminum and hardened steel for maximum durability.
- **Customization:** Choice of curved or straight trigger depending on shooter preference.
