- **Projectile:** FMJ (Full Metal Jacket)
- **Bullet weight:** 52 grains
- **Case:** Steel
- **Primer:** Non-corrosive Berdan
- **Compliance:** CIP Standards
- **Packaging:** Box of 200 cartridges

Ammunition designed for sport shooting

The IW 5.45x39mm FMJ 52gr cartridge is designed for shooters using firearms chambered in this caliber. Its **Full Metal Jacket** bullet ensures consistent feeding and is perfectly suited for **target shooting**.

The historical caliber of the AK-74 rifle

Developed during the Cold War, the **5.45x39 mm** became the standard caliber for the **AK-74**. Designed to offer high velocity, a flat trajectory, and moderate recoil, it remains highly regarded today for its accuracy and shooting comfort on compatible platforms.

Manufactured in accordance with CIP standards

Manufactured according to **CIP standards**, these cartridges feature a **steel case** and **non-corrosive Berdan primers**. This design ensures reliable operation while simplifying firearm maintenance after use.

Conditioning suitable for long sessions

The **200-cartridge** pack allows for a smooth approach to intensive training or extended sessions at the shooting range, while limiting handling between two sets.

FAQ

Which weapons is this ammunition compatible with?

It is intended exclusively for weapons chambered in 5.45x39 mm, such as certain AK-74 type platforms and their compatible variants.

Are the primers corrosive?

No. This ammunition uses non-corrosive Berdan primers, which makes it easier to maintain the weapon after firing.

Can this ammunition be used for hunting?

This FMJ ammunition is primarily intended for sport shooting and training. Its use must comply with current regulations and the intended purpose of the projectile.
