Full frame version with compensator and 5" bull barrel for smooth and stable sport shooting.

Designed for demanding shooters, the **Tisas 2011 Duty Bull Barrel COMP 9x19 pistol** combines precision, comfort and reliability in a modern "Optic Ready" configuration.

- **relaxation:** simple action
- **Frame and cylinder head material:** forged carbon steel
- **Safety features:** manual safety, dog safety, beavertail handle safety
- **caliber:** 9x19 mm
- **Length:** 220.5 mm
- **Height:** 146 mm
- **width:** 37 mm
- **Barrel length:** 124 mm (5" bull barrel)
- **Weight without charger:** 1038 g ±10 g
- **Weight with full magazine:** 1339.7 g ±10 g
- **Magazine capacity:** 17 rounds

The high-end version of the 2011 model, the **Tisas Duty Bull Barrel COMP 9x19** combines robustness, precision, and shooting comfort. Designed for performance at the range, it impresses with its balance, smooth mechanics, and Optic Ready compatibility.

Ergonomics and handling

The **Tisas 2011 Duty Bull Barrel COMP pistol** features a full-frame design with an integrated Picatinny rail, ensuring excellent stability and the ability to mount a light or laser. The textured polymer grip provides a firm and comfortable hold, even during long sessions at the range.

Performance and precision

Its 5" forged chrome-plated steel **bull barrel** increases rigidity and reduces vibration, delivering consistent groupings. The integrated **compensator** limits muzzle rise, allowing for fast and controlled follow-up shots.

Optic Ready compatibility

Designed to evolve with the needs of shooters, this model is **optic ready** and compatible with RMR type micro-red dots, for faster and more intuitive aiming.

Expanded controls and security

Controls such as the bolt catch and magazine release button are enlarged, making them smoother to operate. The ambidextrous safety lever and extended beavertail enhance safety and shooting comfort. The flared magazine well facilitates reloading, a major advantage for IPSC use, for example.

Accessories included

Each unit comes in a case with two 17-round magazines, a bottle of degreaser, and a bottle of Flunatec lubricant for immediate and optimal maintenance. The 2011 models use "Double Stack" magazines, meaning a double-stack arrangement of cartridges to increase ammunition capacity.

Technical explanation - Bull Barrel

The **bull barrel** is thicker than standard barrels, eliminating the need for muzzle bushings. This design increases accuracy, reduces vibration, and improves the weapon's longevity.

Technical explanation - Forged carbon steel

Forged carbon steel combines robustness and longevity. Forged under pressure, it offers a dense and homogeneous internal structure, reducing mechanical wear and ensuring greater shooting consistency.

Technical explanation - Compensator

The **compensator** is integrated into the breechblock. It redirects some of the gases upwards to counteract muzzle rise. The result is improved stability and a higher rate of fire.

- **line of sight:** 153.1 mm
- **Removable trigger:** interchangeable profiles
- **Sighting device:** front fiber optic / notched black rear sight
- **gripping grooves:** front and rear
- **Beaver tail:** elongated
- **bridge:** textured right
- **Chargers:** Dual battery, chrome finish
