YDB9-35	DB9 horizontal extractor	Vente libre	-

Restore extraction reliability to your Diamondback DB9 pistol with this precision-machined replacement horizontal extractor.

This horizontal extractor is designed for the **Diamondback DB9** compact pistol in 9 mm caliber. It ensures efficient gripping of the fired case and consistent side ejection, even in the presence of low-pressure ammunition or residue. It is housed in the slide in a horizontal configuration, typical of the kinematics of this weapon.

- **Compatibility** : Diamondback DB9 (9 mm)
- **Type** : Side horizontal extractor
- **Function** : Gripping and ejecting fired cases
- **Material** : High strength hardened steel
- **Treatment** : Matte black nitriding or phosphating
- **Mounting** : Horizontal housing in the slide, with axle (not supplied)
- **Profile** : Machined claw for 9x19 socket groove
- **Standards** : Diamondback Specifications / OEM Manufacturing

How the DB9 Extractor Works

The DB9 uses a horizontally mounted extractor, housed laterally in the slide, which pivots to grip the throat of the case upon firing. This ultra-thin system must be rigorously aligned to avoid breakages or incomplete extractions. A worn or weakened extractor directly impacts the reliability of the cycle.

Materials and durability

Machined from **hardened alloy steel** , this extractor withstands the repeated micro-shocks of the slide cycle and retains its gripping power even after several thousand shots. The surface treatment ensures excellent resistance to humidity, fouling and corrosion.

Compatibility and recommendations

100% compatible with all **Diamondback DB9** versions. To be mounted with **the original extractor shaft** or equivalent. It is recommended to replace the **spring** or the **extraction piston** at the same

time if wear is observed. This component is intended for gunsmiths and professionals familiar with the tight tolerances of the DB9.
