Compatible with GOMANDER QD LOCK silencers. Available in various thread sizes.

- **Type:** Two-chamber muzzle brake
- **Weight:** 111 to 114 g depending on the version
- **External thread:** 26x1.5 with protective cover
- **Material:** Hardened steel 40 HRC
- **Compatibility: GOMANDER** QD-LOCK

Effective braking and lateral gas dispersion

The **GOMANDER RAPTOR** stands out thanks to its specially designed horizontal vents. This design channels gases to the sides, significantly reducing the feeling of recoil while limiting muzzle rise. In practice, maintaining a sight picture is easier, even during fast-paced action.

Two chambers for enhanced control

The **dual-chamber** design allows for progressive gas management. Shots gain stability, recovery is faster, and follow-up shots become more accurate. This is exactly the kind of configuration that is appreciated in dynamic shooting or during intensive training.

Multi-caliber and multi-platform compatibility

This sheet includes **4 references** to cover the most common gauges and threads on the market:

- **Caliber:** 5.56 / .223 - Thread 1/2x28 - AR15 / M4 / M16 Platform
- **Caliber:** 7.62 - Thread 5/8x24 - Kalashnikov / AK47 / AKM platform
- **Caliber:** 7.62 - M14x1 LH thread - Kalashnikov / AK47 / AKM platform
- **Caliber:** 9 mm - Thread: 1/2x28 - AR9/PCC Platform

QD-LOCK interface and secure mounting

The **M26x1.5** external thread ensures direct compatibility with **GOMANDER QD-LOCK sound moderators** . The RAPTOR comes with its **mounting wrench** , **spirit level** , and **spring washer** , guaranteeing precise and long-lasting indexing.

Steel construction and preserved balance

Machined from hardened **40 HRC** steel, the **RAPTOR** easily withstands mechanical and thermal stresses. Its low weight, between 111 and 114 g depending on the version, limits the impact on the weapon's overall balance.

FAQ

Is this mouth brake compatible with a sound moderator?

Yes, the **GOMANDER RAPTOR** is compatible with moderators using the **QD-LOCK GOMANDER** system, thanks to its external M26x1.5 thread.

What is the difference between a muzzle brake and a flash hider?

A **muzzle brake** like the **RAPTOR** primarily affects recoil and muzzle rise, while a flash hider is mainly intended to reduce the light signature when firing.

Does the RAPTOR come ready to assemble?

Yes, the **GOMANDER RAPTOR** comes with its mounting key, spirit level and spring washer for precise and secure installation.
