PCKKS350	!B! PACK SILENCE KRISS DMK22C 16.5" CAL 22 LR	B	.22 LR	1630.00 € incl. tax

The AR chambered in 22 Lr compact with its red dot and silencer

Ready-to-use pack, ideal for training and leisure at the shooting range.

- **caliber:** .22 LR
- **Operation:** semi-automatic
- **barrel length:** 16.5"
- **Barrel:** 4140 chrome-moly steel, Black Nitride finish
- **no scratches:** 1:16"
- **Thread:** 1/2x28 RH
- **Canon compatibility:** Ruger 10/22
- **cylinder head:** RUGER 10/22 extractor
- **casing:** aluminum
- **handguard:** M-LOK 12"
- **Stock:** Telescopic MILSPEC 6-position
- **Magazines supplied:** 2 x 25 rounds
- **Moderator:** SAK (for .22 LR)
- **Red dot:** FALKE S Police, high-quality platinum

Ergonomics and handling

The **MILSPEC telescopic stock** allows you to adjust the length of support for different shooters and positions. In practical terms, this improves the consistency of shouldering and the repeatability of shooting series—you immediately feel better stability on the firing line.

Stand performance

Built on a mechanism designed to accept a wide range of ammunition, this **rifle** offers smooth cycling even at high rates of fire. When used with a suppressor and subsonic ammunition, the acoustic experience becomes very discreet—perfect for gong or bowling pin practice.

M-LOK

M-LOK is a modular accessory interface system engraved directly onto the handguard. It allows for the mounting of rails, grips, or lights without adding weight to the frame, and maintains an ergonomic surface for the front hand.

4140 Chrome Moly

4140 chrome moly is an alloy steel widely used for gun barrels: it combines mechanical strength and wear resistance. The practical result: a durable, accurate barrel that can withstand sustained firing.

Black Nitride

Black Nitride (nitrated finish) is a surface treatment that increases hardness and corrosion resistance, while reducing friction — the benefit: simplified maintenance and smoother mechanics over the long term.

1/2x28RH thread

1/2x28RH threading is a widespread standard on .22 platforms — it facilitates the mounting of compatible suppressors and accessories, ensuring simple integration of the supplied SAK.

SAK moderator

The **SAK moderator** is a compact silencer that can be disassembled into 3 parts for easy cleaning. Constructed from machined aluminum, it offers significant attenuation (≈31 dB) with compatible ammunition and screws directly onto the 1/2x28RH thread.

Red dot 2 MOA

The **FALKE S sight** offers a 2 MOA dot—precise enough for typical shooting range distances while providing ultra-fast acquisition. Mounted on a high base plate, it promotes a natural posture and consistent aiming.

Options and compatibilities

The platform accepts numerous AR parts and **Ruger 10/22** components, facilitating customization (magnifiers, sights, grips). In practice, this opens up possibilities for gunsmiths and demanding shooters.

Interview

The simple dismantling of the moderator and the clear access to the mechanics make routine maintenance quick: dusting, targeted lubrication and regular inspection are sufficient for optimal longevity.

- **no scratches:** 1:16"
- **compatible barrel:** Ruger 10/22
- **Moderator dimensions:** 140 × 34 mm (SAK)
- **moderator weight:** 160 g
- **optics:** FALKE S — point 2 MOA, CR2032 (~2000 h)

FAQ

Is the package ready to shoot at the range?

Yes, it comes complete (rifle, red dot, moderator) — ready for sport shooting sessions.

Is the SAK easy to maintain?

Yes, it can be disassembled into 3 parts for quick and efficient cleaning.

Does the DMK22C accept all .22 Long Rifle cartridges?

Yes, the mechanism can handle a wide range of ammunition. To optimize the silencer's attenuation, use subsonic cartridges.
