SKU	Designation	French Law	MSRP
GE05166	SD3-G AR10 / AR15 Trigger	A	599.00 € incl. tax

Ultra-fast start optimized for 3-Gun competitions.

The **Geissele SD-3G** is a hybrid trigger with an ultra-short throw, designed for **dynamic 3-gun shooting** . Responsive, smooth, and robust, it allows for very rapid follow-up shots while ensuring excellent mechanical reliability.

- **Type:** Hybrid expansion valve with rolling break
- **Starting weight:** 3.0 - 4.0 lbs (light spring), 4.5 - 5.5 lbs (standard spring)
- **Trigger tail:** Flat (flat bow)
- **Use:** Dynamic shooting, 3-Gun competition
- **Compatibility:** AR-15 / AR-10 - Mil-Spec axes
- **Adjustable:** No
- **Included:** Springs, axles, pins, mounting parts

Hybrid trigger for dynamic shooting

The **Geissele SD-3G** offers a smooth and rapid **rolling action** , inspired by the S3G mechanism. This hybrid architecture provides an ideal compromise between single-stage trigger pull and two-stage behavior, for **fast and consistent engagement** on dynamic shooting courses.

Flat tail: control and speed

The **flat trigger** improves control under the finger by reducing the feeling of weight at the start of the shot. This design ensures linear tactile feedback and appreciable consistency, especially in the **rapid-fire sequences** typical of 3-Gun or IPSC competitions.

Dual spring configuration

The SD-3G comes with two interchangeable springs:

- **Lightweight spring:** for an ultra-fast start of 3.0 to 4.0 lbs
- **Standard spring:** for a firmer feel, 4.5 to 5.5 lbs

All this within a non-adjustable mechanism but perfectly calibrated for **high-level competition** .

FAQ

Is the SD-3G trigger compatible with all AR15s?

Yes, it is compatible with AR-15 and AR-10 rifles equipped with Mil-Spec pins. No adjustments are required.

Can I use the SD-3G for precision shooting or shooting from a supported position?

No, this trigger is optimized for dynamic shooting. It is not recommended for long-range precision shooting.

Which spring should I choose?

The light spring offers a faster start (3 to 4 lbs), ideal for competition. The standard spring goes up to 5.5 lbs for added firmness.
