Optimal stability with adjustable height for shooting prone or supported.

The **Spika Swivel Shooting Bipod** provides reliable stability to improve accuracy during shooting sessions or hunting trips. Its lightweight aluminum construction and swivel system allow for precise and comfortable positioning on various types of terrain.

- **Type:** Shooting bipod for long gun
- **Structure:** Lightweight and sturdy aluminum
- **Adjustable height:** 15 to 23 cm or 23 to 30 cm depending on the version
- **System: Swivel** head for lateral adjustment
- **Feet:** Spring-loaded telescopic legs
- **Folding:** Legs fold for easy transport
- **Support:** Non-slip rubber tips
- **Fixing:** Mounting on **grenadière** (sling swivel stud)

A stable bipod to improve accuracy

On the field and at the shooting range, stability directly impacts shot accuracy. The **Spika 15-30 cm Swivel Bipod** provides solid support at the front of the firearm, reducing unwanted movement and facilitating aiming. It's exactly the kind of accessory you appreciate from the very first use: the firearm stays firmly in place, and aiming becomes more natural.

Two heights to adapt to shooting conditions

This bipod is offered in two versions to suit different situations:

- **Low version:** 15 to 23 cm - ideal for **prone shooting** or very low positions
- **High version:** 23 to 30 cm - suitable for uneven terrain or slightly elevated positions

The telescopic legs allow for quick and precise adjustment thanks to a simple-to-operate spring system.

Lightweight and sturdy aluminum construction

Made of **aluminum** , the bipod offers an excellent compromise between robustness and low weight. This construction guarantees good resistance to the stresses of the terrain while maintaining a maneuverable weapon.

Swivel system for correcting alignment

The **swivel-** mounted head allows for slight lateral rotation of the weapon. This feature facilitates adjustments when the ground is not perfectly flat, improving shooting comfort and scope alignment.

Non-slip feet and easy transport

The **rubber** tips ensure a good grip on most surfaces. The legs fold forward to reduce bulk when transporting or storing in a shooting bag.

- **Adjustment:** Quick spring-loaded adjustment
- **Rotation:** Swivel pivot axis
- **Transport:** Folding legs
- **Grip:** Non-slip rubber feet
- **Assembly:** Standard grenadier compatible

FAQ

How is this bipod attached to a rifle?

The bipod attaches directly to a standard sling swivel located under the stock of the weapon. This system is compatible with most rifles and shotguns equipped with this type of attachment.

Which height should I choose between the two versions?

The 15-23 cm version is generally used for prone shooting. The 23-30 cm version offers more height and is better suited to uneven terrain or slightly elevated positions.

Can the bipod remain mounted on the weapon?

Yes, the folding legs allow the bipod to remain mounted on the weapon without hindering transport or handling.
