KIMZ065	Kit Chien & Gâchette 1911 Skeletonisé Kimber	BF769	B	104.00 € incl. tax

### Hammer and sear set rectified for a crisp and precise 1911 trigger.

The **Kimber 1911 hammer and trigger kit** combines a **skeletonized hammer** with rectified sides and a **perfectly machined trigger**. The entire assembly is precision-crafted to achieve a crisp and consistent trigger pull, adhering to standard 1911 dimensions.

- **Compatibility** : Type 1911 platform
- **Brand** : Kimber
- **Dog** : Skeletonized spur, rectified flanks
- **Trigger (Sear)** : Rectified engagement surface
- **Objective** : Improve the sharpness of the start

Designed for standard-sized 1911 platforms, this Kimber kit includes a skeletonized hammer and matching sear, both meticulously machined. The goal is to achieve a clean, stable, and consistent mechanical interaction.

#### Skeletonized dog with optimized mass

The openwork spur reduces moving mass while maintaining adequate rigidity. The ground sides ensure smooth operation within the frame, minimizing unwanted friction.

#### Trigger refined for precise engagement

The sear's engagement surface is precisely machined to provide consistent contact with the dog. In practice, this results in a crisper takeoff and a more controlled feel - provided the setup is correct.

#### Assembly and adjustment

As with any internal component of the 1911 mechanism, a dimensional check and adjustment by a qualified gunsmith is strongly recommended to ensure safety and reliability.

## **FAQ**

### **Is this kit compatible with all 1911 models?**

It is designed for 1911 models with standard dimensions. A dimensional check and adjustment by a professional are recommended before installation.

### **Does this kit improve the starting weight?**

It is designed to provide a cleaner and more consistent start. However, the final weight will depend on the springs used and the adjustments made.

### **Can the assembly be done by an individual?**

Installing internal parts of the mechanism requires specific skills. It is recommended that the assembly be entrusted to a qualified gunsmith.
