OEM recoil spring guide assembly for Kimber Pro & Compact 4".

The **Kimber 1911 Guide Rod & Plug assembly** is an **OEM** replacement part for **4-inch Pro and Compact** models. Designed to original specifications, it ensures smooth and reliable operation of the recoil spring.

- **Compatibility** : Kimber Pro & Compact 4"
- **Type** : Original OEM Replacement
- **Configuration** : Guide rod + plug
- **Function** : Retaining and guiding the recoil spring
- **Exclusion** : Not compatible with Ultra models

Designed for the Kimber 1911 Pro and Compact with a 4-inch barrel, this recoil spring guide and cap assembly ensures a replacement that meets original specifications. It maintains the manufacturer's intended kinematics.

OEM replacement conforming to Kimber specifications

By opting for an original part, the dimensions and mechanical balance defined for the 4" model are maintained. This guarantees consistent operation of the cylinder head cycle, without modification of the initial configuration.

Targeted Pro & Compact Compatibility

This kit is specifically designed for the 4-inch Pro and Compact versions. It is not compatible with the Ultra models, which have a different internal architecture.

Role of the recoil spring guide

The guide rod ensures the recoil spring is aligned during the firing cycle. Proper adjustment contributes to smooth bolt movement and a controlled operating feel.

FAQ

Is this set compatible with the Kimber Ultra?

No, it is intended exclusively for the 4-inch Kimber Pro and Compact models. The Ultra models use a different configuration.

Is this an original Kimber part?

Yes, this is an OEM replacement that conforms to the manufacturer's specifications.

Do I need to hire a gunsmith for the installation?

Replacing a return spring guide must be done carefully. If in doubt, it is recommended to entrust the installation to a qualified professional.
