- **Laser compatibility:** BE Meyers DAGIR, Eotech OGL, L3 NGAL, PEQ-15, Steiner DBAL, Wilcox RAID Xe
- **Magnifier compatibility:** Aimpoint, Eotech, Vortex, Trijicon (mount height 1.57")
- **Length:** SW4110: Magnifier
- **Length:** SW4120: Laser
- **Length:** SW4130: Laser + Magnifier
- **Weight:** 35 to 72 g depending on the version
- **Origin:** United States

Box contents

- **Media:** Scalarworks® KICK/09™
- **Screws:**
  - (4) #10-32 screw with nylon patch

- **Tools :**
  - Scalarworks® T25 Torx Bit

An extension designed for modern versatility

The **Scalarworks KICK/09** transforms an optical mount into a true multi-accessory platform. Whether adding a **magnifier** , a **laser module** , or both, this extension allows for clean, consistent integration that is perfectly aligned with the main optic. In the field, this translates to smooth ergonomics and a natural transition between sighting systems.

Three configurations to suit every need

Available in three versions - **Magnifier (SW4110)** , **Laser (SW4120)** , and **Combo Laser + Magnifier (SW4130)** - this extension adapts to different operational configurations. The combo version is particularly appealing, ideal for users seeking a compact solution without requiring multiple mounting points.

Extensive compatibility with equipment on the market

The **KICK/09** is designed to work with the **Scalarworks LEAP/02** mount and accepts a wide range of laser modules (DBAL, NGAL, PEQ-15, RAID Xe...) as well as **magnifiers** from leading brands such as **Aimpoint** , **Eotech** , **Vortex** , or **Trijicon** in a **1.57"** height. This ensures seamless integration with the line of sight.

Robust construction and controlled weight

Machined from **7075-T6 aluminum** , this extension combines strength and lightness. **Type III** anodizing ensures excellent resistance to abrasion and outdoor conditions. Depending on the chosen configuration, the weight remains between **35 and 72 g** , maintaining a balanced and responsive setup.

Optimized alignment and ergonomics

With a standardized height of **1.57"** below the optical axis, the accessory placement is perfectly designed to ensure visual comfort and rapid acquisition. This is exactly the kind of accessory that immediately improves the overall usability of the platform.

FAQ

Is this extension compatible with all Scalarworks setups?

No, it is specifically designed for Scalarworks LEAP/02 mounting.

Can a laser and a magnifier be mounted simultaneously?

Yes, the SW4130 version is designed to accommodate both accessories at the same time.

Which magnifiers are compatible?

The Aimpoint, Eotech, Vortex and Trijicon models with 1.57" height mounting are compatible.
