A92000	Leapers UTG PRO Claw Optical Mount for MP5/MP5K	Vente libre	13.8	4.1	3	Black	21mm rail	110.00 € incl. tax

An extended 13-slot Picatinny rail in a low and lightweight mount.

The **Leapers UTG PRO Claw Mount** adds an extended Picatinny rail to MP5 and MP5K-style firearms. Its 13 notches provide ample space for positioning optics according to their size and desired eye relief. The mount clamps to the receiver using a claw-lock interface and T10 Torx screws. This design facilitates precise installation with a recommended torque of 20 in-lbs. Machined from 6061-T6 aluminum with a matte black anodized finish, it combines strength, a compact size, and a light weight of 57 g. Its low profile minimizes optic elevation. Designed and manufactured in the USA, this **UTG PRO Picatinny mount** is suitable for pistols and rifles based on the MP5 or MP5K architecture.

- **Brand:** Leapers
- **Product line:** UTG PRO
- **Model:** Claw Mount Extended Picatinny
- **Type:** claw mount with Picatinny rail
- **Compatibility:** MP5 and MP5K type pistols and rifles, as well as clones
- **Attachment:** by tightening onto the case

- **Locking:** Torx T10 screw
- **Tightening torque:** 20 in-lb
- **Material:** 6061-T6 aluminum
- **Finish:** matte black anodized
- **Weight:** 57 g (2 oz)
- **Made** in the United States

An extended Picatinny rail for MP5 and MP5K platforms

The **Leapers UTG PRO Claw Mount** provides a 13-slot Picatinny interface for pistols and rifles based on the **MP5** or **MP5K** architecture. The available length allows for greater flexibility in adjusting the optic's position to suit its size and the weapon's configuration.

A lightweight, low-profile construction

The body is machined from **6061-T6 aluminum** and then protected by a matte black anodized finish. Its weight of 57 g minimizes the added mass to the receiver. The low profile also keeps the rail as close as possible to the weapon to reduce the height of the optics mounting.

A fixing system using claws and Torx screws

The locking interface secures the mount to the receiver. The T10 Torx screws must be tightened to the specified torque of 20 in-lb, following the instructions in the supplied manual. The firearm must be unloaded and made safe before any mounting or adjustment.

FAQ - Leapers UTG PRO Claw Mount MP5/MP5K

Is UTG editing compatible with MP5 clones?

Yes. The UTG mount fits on the various MP5 clones on the market such as MAC, Zenith, PTR or POF.

What mounting hardware is provided?

The set includes four #6-32 Torx T10 socket head cap screws, four locking claws, a T10 wrench, and an instruction manual.
