AMD113	Amend2 AR-15 Mod-3 5.56/.223 30-round magazine, Coyote brown	A	5.56x45 (223)	30	Brown	32.00 € incl. tax

A rigid 30-round magazine designed to withstand shocks and extreme temperatures.

The **Amend2 Mod-3 AR-15 magazine** holds 30 rounds of 5.56/.223 ammunition. Its fiberglass-reinforced nylon body offers increased rigidity and resistance to both impacts and temperature variations compared to the Mod-2 generation. The textured surface enhances grip without hindering magazine handling. Inside, the self-lubricating, four-point anti-tilt follower guides the cartridges, while the stainless steel spring resists corrosion and has no compression memory. The base retains the "2" marking, along with a more discreet visual identity. Made in the USA, this **Amend2 Mod-3 magazine** can be finished with Cerakote or laser engraving.

- **Brand:** Amend2
- **Model:** Mod-3
- **Type:** Detachable magazine for AR-15
- **Capacity:** 30 cartridges
- **Advertised compatibility:** 5.56/.223
- **Body:** nylon reinforced with long glass fibers
- **Body properties:** rigidity and resistance to shocks and temperatures
- **Surface:** gripping texture
- **Lift:** self-lubricating, four-point anti-tipping
- **Spring:** Reinforced stainless steel, memory-free and corrosion-resistant
- **Material customization:** compatible with Cerakote finish and laser marking
- **Color:** Black or Coyote Brown
- **Made** in the United States
- **Regulatory category provided:** A1

A new design for the Amend2 Mod-3 charger

The **Amend2 Mod-3 AR-15 magazine** uses a nylon reinforced with long fiberglass. This new resin increases the body's rigidity and its resistance to impacts, as well as to high and low temperatures. The 30-round capacity is compatible with **5.56/.223** configurations.

A textured grip without any bothersome excess thickness

The raised exterior surface improves grip when handling the magazine. Its texture is designed to maintain smooth movement during insertion and removal. The muted markings reduce the visual presence of the brand, while the sole retains the number 2, a signature of Amend2.

Anti-tip lift and stainless steel spring

The self-lubricating follower is guided at four points to limit its movement within the magazine body. It operates with a reinforced stainless steel spring, resistant to corrosion and designed without memory effect. These components ensure smooth cartridge feeding during normal use.

Acquisition conditions and regulations

This 30-round magazine is classified as **category A1** . For a sport shooter, the acquisition of a category A magazine with a capacity greater than 10 rounds and less than or equal to 30 rounds, usable with a category B centerfire semi-automatic shoulder-fired weapon, is subject to presentation of the authorization for the weapon, the frame, or the lower part of the receiver held. A shooting license alone is not sufficient. Except as permitted by regulations, acquisition and possession are prohibited.

The separate magazine retains its own classification. A firearm with its own classification of B does not automatically become A1 until this magazine is inserted. When a magazine holding more than 10 rounds is inserted into a Category B centerfire semi-automatic shoulder-fired firearm, the entire assembly falls under Category A1.

Carrying a firearm is prohibited except in exceptional circumstances as provided by regulations. Transport requires a legitimate reason and must comply with the conditions of the exemption held; any firearm transported with a magazine must be rendered immediately unusable. Storage must be in a safe, a suitable gun cabinet, or a secure vault.

FAQ - Amend2 Mod-3 AR-15 30-Round Magazine

Can the charger receive a custom finish?

Yes. The material is advertised as compatible with the application of a Cerakote finish and with laser marking.

How to visually recognize the Mod-3 generation?

It adopts a new texture and more discreet markings, while retaining the number 2 molded on the sole.
