Versatile bullets offering precision and performance for hunting.

Sierra 7mm (.284) bullets are designed for **hunting** , combining **accuracy** and **terminal effectiveness** on game.

- **Caliber:** 7 mm (.284)
- **Types:** HPBT, SPT, SBT, HP
- **Weight:** 150 to 183 grains
- **Construction:** Jacketed lead core
- **Profiles:** Hollow point, spitzer, boat tail
- **Use:** Hunting medium to large game

Warheads designed for ballistic performance

In the field, the **Sierra 7mm (.284)** offers an excellent balance of speed, stability, and accuracy. Their design produces flat trajectories, particularly appreciated at medium and long ranges. This

consistency is quickly apparent, whether hunting from a blind or stalking.

Different profiles to adapt to each situation

The range offers several profiles: **HPBT** , **SPT** , **SBT** , and **HP** . **Boat Tail** versions improve flight stability and reduce drag, while **Spitzer** ogives enhance aerodynamic penetration. Hollow points (**HP**) provide specific impact behavior while maintaining excellent accuracy.

A wide range of weights to suit the game

With weights ranging from 150 to 183 grains, these bullets allow for load adjustments depending on the intended use. Lighter projectiles prioritize velocity and trajectory tension, while heavier ones ensure better penetration on tougher game.

FAQ

Are these bullets suitable for long-range shooting?

Yes, especially the HPBT and SBT versions which offer excellent stability and an optimized trajectory at medium and long distances.

What profile should I choose for hunting?

Spitzer bullets are versatile, while Boat Tail bullets are recommended for longer shots due to their better aerodynamics.

Are these bullets suitable for reloading?

Yes, they are designed to guarantee high consistency, making them ideal for precision reloading.
