A slender, balanced revolver designed for precision and recoil control on the firing line.

The **Chiappa Rhino 50 DS Revolver** in **.357 Magnum** combines innovative architecture and meticulous finishing for the sporting shooter. Its **low-profile barrel** limits barrel rise and improves aim recovery, while the lightweight construction promotes balance and consistency.

- **caliber:** .357 Magnum
- **barrel length:** 5 inches (127 mm)
- **type of action:** double and single action
- **frame:** Ergal (aeronautical aluminum alloy)
- **sights:** adjustable
- **mounting:** 21mm Picatinny rail
- **accessories included:** 3 Moon Clips, screwdriver set, swab, polypropylene case

Low-positioned barrel

The **low-mounted barrel** aligns the barrel axis with the lower chamber of the cylinder rather than the upper chamber. This move brings the recoil axis closer to the shooter's hand, reducing the torque at the start of the shot: less windup, quicker return to the target, and better control of close bursts.

Ergal (aeronautical aluminum alloy)

Ergal is a high-performance aluminum alloy used in aeronautics for its stiffness-to-weight ratio. On the **frame** , it guarantees a rigid and lightweight structure, improving the balance of the weapon

and reducing fatigue during long sessions at the shooting range.

Moon Clip

Moon Clips are circular loading devices that hold cartridges together for faster loading and ejection from the barrel. In competition, they reduce reloading time and standardize handling, promoting an efficient rate of fire.

Picatinny rail

The **Picatinny rail** allows for the attachment of compatible accessories (stand optics, alignment laser, training tools). This standard ensures a solid attachment and position repeatability for equipment intended to improve target acquisition.

Double and single action trigger

The dual-mode system combines **single action** (short stroke, precise trigger) and **double action** (cocking and firing in one pull). This versatility allows the rate of fire and feel of fire to be adapted to the event or the shooter's preference.

- **capacity:** 6 shots
- **total length:** 240 mm
- **weight:** 895 g
- **available colors:** anodized black, chrome ('hard chrome')
