A balanced and precise revolver, designed for recoil control at the firing point.

The **Chiappa Rhino 40 DS Revolver** in **.357 Magnum** combines mechanical innovation and meticulous workmanship for the sport shooter. Its **low-profile** design reduces barrel rise and promotes rapid re-aiming.

- **caliber:** .357 Magnum
- **barrel length:** 4 inches (102 mm)
- **type of action:** double and single action
- **frame:** Ergal (aeronautical aluminum alloy)
- **sights:** adjustable
- **available finishes:** anodized black, hard chrome stainless steel
- **accessories included:** 3 Moon Clips, screwdriver set, swab, polypropylene case
- **capacity:** 6 shots

Low-positioned barrel

The **low-positioned barrel** aligns the barrel axis with the lower chamber of the cylinder. By bringing the recoil axis closer to the hand, the rotational torque at the start of the shot is reduced: less wind-up, better recoil management and faster return to the target, assets appreciated in series and cadence exercises.

Ergal (aeronautical aluminum alloy)

Ergal is an aluminum alloy used in aeronautics for its strength-to-weight ratio. Used for the **carcass** , it reduces overall mass without sacrificing structural rigidity, improving balance and handling during long pit sessions.

Moon Clip

Moon Clips are quick-loading devices that keep cartridges grouped together for easy ejection and reloading. They speed up reloading sequences and standardize handling in training conditions.

Picatinny rail

The **Picatinny rail** allows for the attachment of compatible accessories (stand optics, alignment laser, training light). This standard provides stability and repeatability for adding equipment to improve target acquisition or weapon customization.

Double and single action trigger

The dual-mode system combines a **single action** for a short, precise stroke and a **double action** for firing from rest. This versatility allows the trigger behavior to be adapted to the user's events and shooting style.

- **total length:** 215 mm
- **weight:** 850 g
- **mounting:** 21mm Picatinny rail
