Precision warheads haendler and natermann for competition shooting

Ogives high speed

- Copper lead ball with extra layer of plastic
- avoids bursting and deposits of lead
- For all loads and weapons, also suitable for rifle charges

Semi wad cutter

- The alliance of a good penetration in the air and a frank cut of the target. For average loads.

The sporting success is conditioned by a maximum quality and precision. The H & N warheads combine these two strengths thanks to the successful combination of artisanal dexterity and the most modern production technologies.
